Hyderabad, India | +91-7981735076 | vigneshs1976@gmail.com | linkedin.com/in/vignesh-soma-75b3a8298 | github.com/vigneshs1976-maker

PROFESSIONAL SUMMARY

Full Stack Web Developer skilled in Python, Django, React.js, MySQL, and REST APIs, with hands-on experience building secure, scalable web applications and AI-powered systems. B.Tech graduate in Artificial Intelligence and Data Science (CGPA 7.88/10.0), backed by structured industry training and multiple self-driven certifications spanning the full web development stack. Eager to bring strong engineering and problem-solving skills to a product- or service-based organization building enterprise-grade solutions.

TECHNICAL SKILLS

Languages: Python, JavaScript

Frontend: React.js, HTML5, CSS3, Responsive Design

Backend: Django, REST APIs, JWT Authentication, MVC Architecture

Databases: SQL, MySQL

Tools & VCS: Git, GitHub, VS Code

Core Concepts: CRUD Operations, Data Privacy, Real-Time Systems

PROJECTS

Diary Web Application

Django | React.js | MySQL | JWT | REST API

- Designed and developed a full-stack diary web application with secure user authentication using JWT and protected REST API endpoints.
- Implemented full CRUD operations with real-time updates, auto-save, and search functionality backed by a MySQL relational database.
- Built a responsive, mobile-first UI in React.js, ensuring a smooth user experience across devices while enforcing data privacy at both the API and database layers.

Leveraging Machine Learning To Combat Deforestation And Preserve Bio Diversity

Python | Django | TensorFlow |

Vision Transformer (ViT) | MySQL | OpenCV

- Designed and developed a scalable *deforestation detection system* using *Python, Django, TensorFlow/Keras, and Vision Transformer (ViT)* to identify deforestation patterns from satellite imagery.
- Integrated MySQL for user management and prediction history while implementing secure authentication, image upload, and real-time inference through a responsive Django web interface.
- Built an automated preprocessing and prediction pipeline using OpenCV, achieving reliable multi-label classification of satellite images and providing actionable insights through visualization dashboards.

EXPERIENCE

Full Stack Web Development Trainee

Teks Academy

Course-Based Industry Training

2025 – 2026

- Developed responsive front-end web pages using HTML, CSS, JavaScript, and React.js, implementing component-based architecture and state management best practices.
- Built RESTful APIs with the Django framework and integrated them with MySQL for efficient backend data handling, storage, and retrieval.
- Gained practical exposure to the full software development lifecycle — from UI design through API development to database optimization.

EDUCATION

Vignan Institute of Technology and Science, Hyderabad

Nov 2023 – Apr 2026

Bachelor Of Technology in Artificial Intelligence and Data Science

CGPA: 7.8 / 10.0

TKR College of Engineering and Technology, Hyderabad

Jun 2020 – May 2023

Diploma in Electrical & Electronics Engineering

CGPA: 7.0 / 10.0

Brilliant Grammar High School

May 2020

Secondary School Certificate (SSC)

CGPA: 10.0 / 10.0

CERTIFICATIONS

- Full Stack Web Development Using Python — Teks Academy
- Python Essentials with Django — TASK (Telangana Academy for Skill & Knowledge)
- Become a Full Stack Web Developer: Beginner to Advanced — Udemy (19.5 hrs)
- Complete Web Developer Bootcamp: Beginner to Advanced — Udemy (41 hrs)
- Intro to Django for Web Development: A Crash Course
